

Now We're Talking!

Introducing the E-Phone, a two channel portable radio which produces high quality audio, designed for ease of deployment and simplicity in use during diving operations. Up to two divers can communicate with the surface in a simplex configuration while the dive supervisor operates a PTT (Push To Talk) system via the control panel or included dual ear headset. Whether you're running a comms-only operation, or combining your audio with certain compatible video systems such as the E-Vision, you're guaranteed to get clear and powerful comms with the E-Phone 2.

Features and Specifications

Battery:	Rechargeable lead acid, 2.3 Ah 12V	Dimensions:	232 x 192 x 111 mm
Power Input (Charger):	100-240 VAC	Weight:	1.6 Kg
Standby Current:	100mA	IP Rating:	65 (lid open), 67 (lid closed)
Frequency Response:	400Hz to 10Khz	What's included:	E-Phone 2 surface control unit Dual ear PTT headset with boom mic Mains AC charger Quick-start guide
Audio Power Output:	2W into 8ohm		
Running Time:	approx. 10 hours
