

A useful alternative to helmet mounting brackets, the C-Tecnicos hand-held grip allows the diver increased manoeuvrability and direction of the camera view and light path. The camera and light are clamped to the mounted 'V' blocks by stainless steel bands which can be adjusted to suit various diameters. The camera and light can then be used to gain a view into hard to reach locations through the reach of the diver. Manufactured from marine grade stainless steel and hard anodised aluminium the hand grip is a robust yet lightweight accessory.

The Camera and Light Hand Grip is available in 2 different options:

Model: CT9010

For body diameter: 40 - 60mm
Dimensions: 140 x 130 x 190mm
Weight: 845 grams

Model: CT9012

For body diameter: 30 - 35mm
Dimensions: 140 x 130 x 145mm
Weight: 780 grams
